Quiz — K8s local

Fillable quiz — type answers in the fields. Blank copies are already under `my-work/quizzes/`; answer them in place. Answer keys are not included.

Complete after the module reading. Check the separate answer key only after you attempt every item.

1. Expand **Deployment** vs **Service** in one sentence each, and explain **how** they cooperate for a MailGuard API.

2. What does a readiness probe (`/readyz`) gate, and **why** is that different from liveness (`/livez`)?

3. Why are resource requests useful even on a laptop kind/minikube cluster?

4. Name one difference between kind and a managed cloud Kubernetes service, and **why** that matters for production claims.

5. Scenario: liveness probe path `/livez` always returns 500. What happens step by step, and **why**?

6. Spot the bug / why: container has no resource requests and a memory leak. What cluster symptom appears and how?

7. Literacy: Why set `runAsNonRoot` (PSS restricted shape), what does the starter NetworkPolicy deny/allow (and kind ≥ 0.24 vs older kind), and why avoid recommending community ingress-nginx?
