Quiz — capstone mail filter

Fillable quiz — type answers in the fields. Blank copies are already under `my-work/quizzes/`; answer them in place. Answer keys are not included.

Complete after the capstone reading. This quiz is **required**. Use the separate answer key only afterward.

1. Name the three policy actions this course uses for outbound messages, and **why** `hold` exists instead of only allow/reject.

2. What does “first-match-wins” mean for an ordered rule list, and **how** does order become a security-sensitive choice?

3. Why must tests fail on stubs before they pass on your implementation?

4. Where should finished assignments and filled quiz PDFs be stored in this repo, and **why** keep them off the public site?

5. Name two Must rubric themes (not row IDs) a portfolio-ready demo must satisfy — for each, **why** a reviewer cares.

6. Scenario: Your demo only works with secrets hard-coded on your laptop. Which Must hygiene expectation fails, **how** do you fix it, and **why** that fix matters for mail/identity work?
