Quiz — Global privacy & collab

Fillable quiz — type answers in the fields. Blank copies are already under `my-work/quizzes/`; answer them in place. Answer keys are not included.

1. Name five privacy regimes covered in this module's kata map (plus the EU AI Act as AI literacy). For one privacy regime, state **why** a hold-queue product might fall in scope.

2. Scenario: support in another country needs hold contents — what do you check first, and **how** do those checks order (legal → access → retention)?

3. Spot the bug / why: scheduling a recurring "mandatory" meeting at 23:00 for half the team permanently.

4. APPI is primarily associated with which country, and **why** might its breach expectations differ from GDPR in practice (high level)?

5. Why prefer async written handoffs for security incidents across timezones?

6. Does this module teach a new spoken language? **Why** is that out of scope for this course?

7. Give the EU AI Act dates for prohibited practices, GPAI obligations, and general application. **Why** does an AI-assisted hold triage feature care about more than GDPR alone?
